

FM 齿轮分流器

FM ROTARY GEAR FLOW DIVIDERS

简介 General Description

FM 分流器能为车辆、农业、材料处理和设备制造行业提供稳定可靠的同步解决方案，作为一种马达它有如下功能：

- 并联油缸或液压马达的同步操作
- 在单泵供油的场合，可一定比例向多个油路分配流量
- 当压力需高于泵的工作压力时可以进一步提压力值

FM flow dividers provide efficient, reliable service for a wide variety of applications in agricultural, materials handling as well as in construction equipment, they have the following functions from a single pump source:

- synchronized operation of multiple cylinders or hydraulic motors.
- proportional division of pump output among several circuits.
- intensified pressure when pressure higher than pump capacity is needed.

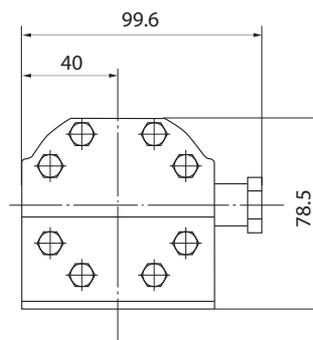

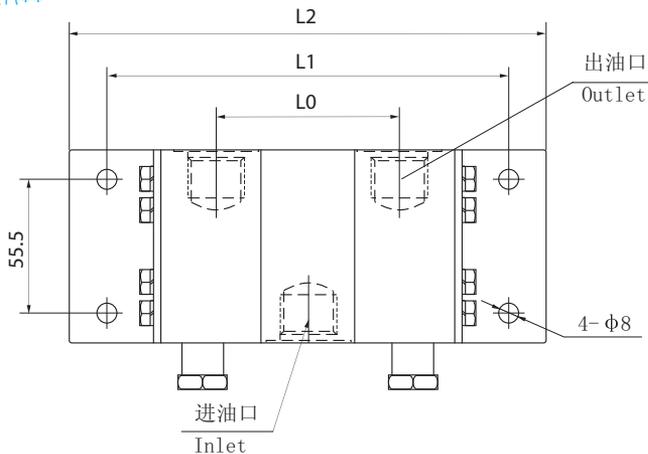

型谱 Order Code

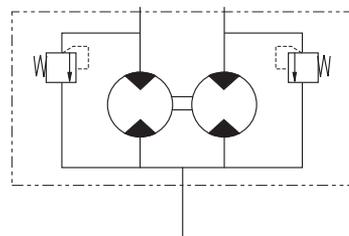

FM		*	-	*	*	*	-	*
A	铝 Aluminium	壳体材料 Housing Material		油口形式 Ports Configurations		细节描述 Detailed description		
C	铸铁 Cast Iron							
2	2个 2 Section	分配室数目 Number Of Section		S SAE 油口 SAE Ports		S SAE 油口 SAE Ports		
4	4个 4 Section							
6	6个 6 Section							
R	带溢流阀 With Relief Valve	溢流阀 Relief Valve		G 管螺纹(BSP) BSPP Ports		0.061-0.5370 in ³ /r 0.061 to 0.5370 in ³ /r 1.0-8.8 cc/r 1.0 to 8.8 cc/r		
N	不带溢流阀 Without Relief Valve							
		分配室排量 Displacement Of Each Section
