

简介 General Description

CBR 齿轮泵是浮动侧板式轴向压力补偿高压齿轮泵，泵内集成了单向阀和溢流阀，与两位两通电磁卸荷阀配合使用，可实现典型的升降液压系统，该泵还可用于各种高压小流量的液压系统中。

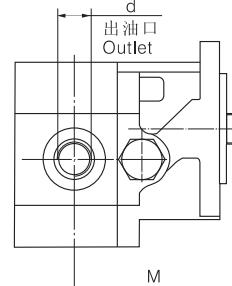

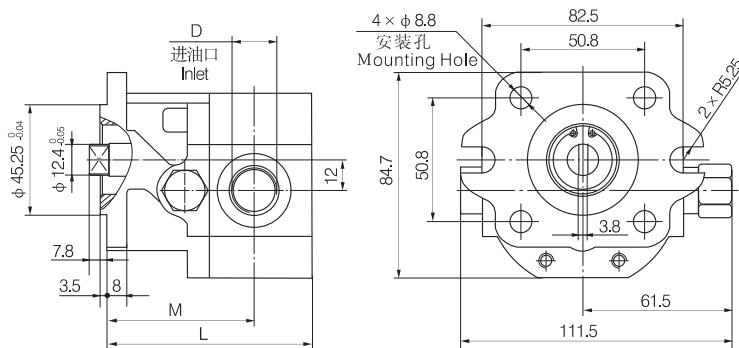

Equipped with a relief valve and a check valve, the CBR pump features small displacement, high pressure. Its axial clearance is compensated automatically by the floating side plates. It is easy to get a power up, gravity down circuit by combining CBR pump and a two-way two positions release valve.
